To whom it may concern,

Thompsons of Prudhoe have been established since 1948 with our headquarters based in Low Prudhoe Northumberland. We are the leading demolition and earthworks contractor in the North with over 300 employees. We operate a fleet of 135 trucks plus a vast array of plant equipment.

Thompson's manage the operation of Quarries, Waste Disposal Sites and Recycling Centres across Northumberland, Durham, Cumbria and Tyne & Wear.

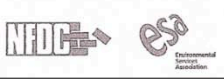

After agreeing to try GT Radial via our local tyre dealer Hexham Tyres on the following products 295/80R22.5 GT659+ 11R22.5 GT686 Mixed Service and 385/65R22.5 GT876 Mixed Service. We found the Price Per Kilometer performance of the products to be excellent in comparison with other market brands used of a more higher market positioning. Hence we have seen a cost reduction in our tyre costs during the last 12 Months that we have been using the GT Radial product.

We have also seen the casing durability playing a major factor in reducing our tyre costs further on down time and less tyre damage than previous experienced versus other tyres used.

Ronnie McGrouther

 Transport Manager

- Waste Management
- Bulk Excavators
- Site Clearance
- Demolition
- Skip Hire
- Recycling
